

Production

Serigraph Glass is made to order. Dimensions and/or CAD drawings are to be provided by the customer and glass will be produced to this specification. Standard glass cutting tolerance is +/- 2 mm.

Glass dimensions

The maximum Serigraph Glass panel size is 1500 × 3000 mm

Glass thickness

In most instances we produce Serigraph Glass on 6mm thick glass with polished edges, other thicknesses are also available. The build-up of the decoration on the glass is almost imperceptible and will not affect the overall thickness of the glass.

Glass weight

The weight of 6mm thick glass is around 15kg/m².

Glass processing

Toughened safety glass, drill holes, bevelling and cut outs are all available if requested at the time of ordering. When working with toughened glass, once toughened, the glass cannot be re-sized, re-processed, nor drilled etc.

Installation

Peascod does not provide framing nor installation. We may be able to suggest installers in your area who are able to work with our glass. Please get in touch to find out more.

The above information and recommendations are based upon our experience and are offered in good faith but without guarantee. It remains the responsibility of the end user to determine the suitability of the materials for the particular purpose intended.
